English for Specific Purposes
ILE-498 English for Engineering Sciences
Research Papers Practice
Professor: Samuel Cornielle

Student Names	
----------------------	--

The goal of this practice is to get the student familiarized with the structure of research papers and their significance in the academic community. Groups of two will be tasked to find (one) research paper from **Google Scholar** related to any of the following engineering fields:

- Renewable Energy
- Materials Science/Engineering
- Technology

Once an article is selected, select and define 5 keywords and respond the analysis questions that follow up

Research Paper Title	
-----------------------------	--

Keyword	Definition

What has been done?

What is the problem?

How was the problem solved?

What was found out?

What does it mean?

Who helped out?

Whose work was referred to?
